PROFESSIONAL SUMMARY

Computer Technology graduate with 1,800 hours of hands-on IT and administrative support experience gained through an internship at a shipping and logistics company. Background spans manual QA testing of a production biometric attendance system (test case writing and execution, pre-release testing, and bug reporting/tracking in an Agile/Kanban workflow), data entry and technical support/troubleshooting. Also plans, directs, and manually tests personal software projects built with AI-assisted development, tracking work through GitHub Issues and Kanban boards. Detail-oriented, reliable, and quick to learn new systems, with fast and accurate typing (80+ WPM).

CORE SKILLS

QA & Testing: Manual, Functional & Regression Testing; Test Case Writing & Execution; Release/Pre-Release Testing; Bug Reporting & Tracking; Agile/Kanban Workflows

Technical Support: Basic Hardware/Software Troubleshooting; Hardware & Software Installation; End-User Technical Support; Data Entry

Web & Technical Familiarity: HTML, CSS, JavaScript, SQL; Git & GitHub (incl. Issues, Kanban Boards); VS Code; AI-Assisted Development

Software & Productivity Tools: Microsoft Excel & Word; Google Sheets & Docs

Typing Speed: 80+ WPM (Monkeytype)

EXPERIENCE

IT and Administrative Support Intern — Avega Bros. Integrated Shipping Corp. July 2025 – July 2026 (1,800 hrs)

- Performed manual QA testing for production updates to BITS, a biometric attendance system, by developing and executing test cases, conducting pre-release testing, and reporting and tracking defects across overtime, shift, punch-time, and reporting workflows.
- Used Agile/Kanban practices with a GitHub board to track sprint tasks through To Do, In Progress, Testing, and Done stages.
- Entered and maintained inventory, administrative, and biometric attendance records, verifying data for errors and inconsistencies before finalization.
- Organized and maintained physical and digital records for efficient retrieval while supporting the real-time attendance dashboard and associated system data.
- Provided technical and administrative support through basic hardware/software troubleshooting, installation, and configuration for office systems.

SELECTED PROJECTS

ArcaneTyper — Multiplayer Typing Game (AI-ASSISTED BUILD) arcane-typer.vercel.app

- Wrote requirements and directed the AI-assisted build of a web-based typing game with survival, practice, and real-time duel modes, plus leaderboards, achievements, and user accounts.
- Manually tested game modes, scoring, and real-time duel flows, and tracked bugs and enhancements using GitHub Issues.

Mimic — Android Party Game with Private Encrypted Vault (AI-ASSISTED BUILD) github.com/lbemCabahug/mimic

- Planned requirements and directed the AI-assisted build of an Android social-deduction game (3 game modes, 5 word packs, LAN multiplayer for up to 8 players) with a private encrypted photo/video/notes vault unlocked by a secret gesture.
- Manually tested game and vault-security flows (secret-gesture unlock, PIN setup, failed-PIN lockout, auto-lock, encrypted video playback), and verified features against an automated suite of 450+ tests plus manual checks on a physical release-mode device.
- Identified release-only defects, including a vault setup failure that appeared only on clean installs, and adopted a practice of testing every release build on a wiped physical device.

EDUCATION

Bachelor of Industrial Technology, Major in Computer Technology

Cebu Technological University – Danao Campus | August 2022 – May 2026

Academic Distinction Awardee | Dean's Lister

TRAINING & CERTIFICATIONS

Creative Web Design — TESDA, 102 hours

LANGUAGES

Cebuano (Native) | Filipino (Fluent) | English (Professional Working Proficiency)
