PROFESSIONAL SUMMARY

Computer Technology graduate with 1,800 hours of hands-on IT and administrative support experience in the shipping and logistics industry. Experienced in manual QA testing of a production biometric attendance system, including test case preparation and execution, pre-release testing, and defect reporting in an Agile/Kanban workflow. Skilled in data entry, basic technical troubleshooting, and testing personal software projects developed with AI-assisted workflows, tracking defects and enhancements through GitHub Issues. Detail-oriented, adaptable, quick to learn new systems, and proficient in typing at 90+ WPM.

CORE SKILLS

QA & Testing: Manual, Functional & Regression Testing; Test Case Writing & Execution; Release/Pre-Release Testing; Bug Reporting & Tracking; Agile/Kanban Workflows

Technical Support: Basic Hardware/Software Troubleshooting; Hardware & Software Installation & Configuration; End-User Technical Support; Data Entry & Record Verification

Web & Development Tools: HTML, CSS, JavaScript, SQL; Git & GitHub (incl. Issues, Kanban Boards); Visual Studio Code; AI-Assisted Development

Productivity Tools: Microsoft Excel & Word; Google Sheets & Docs

Typing Speed: 90+ WPM (Monkeytype, 30s English)

EXPERIENCE

IT and Administrative Support Intern — Avega Bros. Integrated Shipping Corp. July 2025 – July 2026 (1,800 hrs)

- Conducted manual QA testing of production updates for BITS, a biometric attendance system, by preparing and executing test cases, performing pre-release checks, and reporting and tracking defects across overtime, shift, punch-time, and reporting workflows.
- Tracked sprint tasks using a GitHub Kanban board and workflow stages: To Do, In Progress, Testing, and Done.
- Entered and maintained inventory, administrative, and biometric attendance records; checked data for errors and inconsistencies before finalization.
- Organized physical and digital records for efficient retrieval and supported the real-time attendance dashboard and related system data.
- Provided basic hardware/software troubleshooting, installation, configuration, and general office technical support.

SELECTED PROJECTS

ArcaneTyper — Multiplayer Typing Game (AI-ASSISTED BUILD)

[arcane-typer.vercel.app](#) · [GitHub](#)

- Defined project requirements and guided AI-assisted development of a web-based typing game featuring survival, practice, and real-time duel modes, along with leaderboards, achievements, and user accounts.
- Manually tested gameplay modes, scoring, and real-time multiplayer interactions; documented bugs and tracked enhancements through GitHub Issues.

Mimic — Android Party Game with Private Encrypted Vault (AI-ASSISTED BUILD)

[github.com/lbemCabahug/mimic](#)

- Defined requirements and guided AI-assisted development of an Android social-deduction game featuring three game modes, five word packs, LAN multiplayer for up to eight players, and a private encrypted vault for photos, videos, and notes.
- Manually tested gameplay and vault-security features, including gesture unlock, PIN setup, failed-PIN lockout, auto-lock, and encrypted video playback. Performed additional testing on a physical device running the release build.
- Identified release-specific defects, including a vault setup issue on clean installs, and incorporated clean-install testing on a wiped physical device into the release-testing process.

EDUCATION

Bachelor of Industrial Technology, Major in Computer Technology

Cebu Technological University – Danao Campus | August 2022 – May 2026

Academic Distinction Awardee | Dean's Lister

TRAINING & CERTIFICATIONS

Creative Web Design — TESDA, 102 hours

LANGUAGES

Cebuano (Native) | Filipino (Fluent) | English (Professional Working Proficiency)
